# Tomato Lycopene Complex

All you need is a little **TLC!**

## About Parry Tomato Lycopene Complex

Parry Tomato Lycopene Complex is a wholesome and natural tomato extract that can be used in a wide variety of condition specific formulations. The unique extraction methods and dedicated facilities, combined with the selection of only the finest tomatoes, make our formulations the most stable and efficacious lycopene-based products available.

## Manufacturing Process

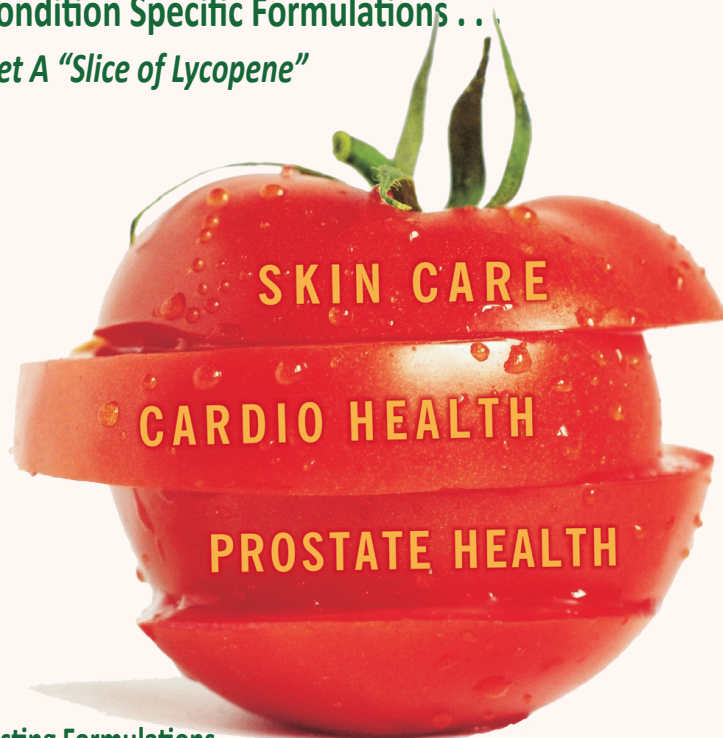

- Dedicated facility designed for the selective extraction of tomato lycopene
- Gentler process retains all the good health benefits of various phytonutrients
- No risk of cross-contamination with other products

## Guaranteed Stability: 2 Years

- Lycopene is highly unstable by itself.
- Parry's unique extraction technology processes provide highly stable lycopene for use in formulations
- Rigorous stability and safety tests are implemented throughout the manufacturing process

## Existing Formulations

- **Derma-360™** is a proprietary blend of proven ingredients, including lycopene, designed to protect and enrich the **skin**.
- Our Lycopene and Omega-3 blend, **T-Omega 360™**, combines the cardiovascular benefits of lycopene and ALA to create an efficacious **healthy heart** formulation.
- Lycopene and Saw Palmetto are two well known prostate health ingredients. Unfortunately they are unstable when blended together - UNTIL NOW!

Valensa has developed a unique stabilization process in which the clinically proven Parry Tomato Lycopene and patented USPlus® saw palmetto extract (US Patent # 6,669,968 & 6,319,524) can be combined in a stable, efficacious formula for **prostate health**, called **Prostate 360™**.
